Overview

This guide is intended to show a Qlik Sense user the steps to prepare for Qlik Sense 301. Administrators are also given files to set up the Qlik Sense Server environment; these are provided separately from this User package.

This document guides you through identifying data files you will use in the course.

Document version history

VERSION	DATE	NOTES
1	14-May-20	Initial release

Qlik Sense 301

Before you Begin

Verify that you have the following:

- The course data file(s)

📁 Files for Data Manager (Module 2 Exercises)
📁 Files for Data Manager (Module 2 Follow-along)

- Permission to create apps

Installation

1. Copy the course data folders for module 2 to a local folder you can access from your Internet browser. If necessary, note the location of the files.
